SKILLS

- Full-Stack Web Development
- Cross-Platform Mobile Apps
- Game Development & Design
- User Experience Design

Education

B.Tech – Information Technology
Nandha Engineering College
2022 – 2026
CGPA: 7.2/10

CERTIFICATIONS

- UI UX Certificate
- Data Analysis Training
- Unity Game Development Certificate

ACHIEVEMENTS

- Completed 30+ Projects
- Built and deployed full-stack applications independently
- Strong problem-solving and debugging skills

PROFILE

Passionate and multi-skilled developer with expertise in web, mobile, and game development. Proficient in modern frameworks like React.js, React Native, and Unity. Experienced in building scalable, performance-driven applications with focus on user experience and clean code architecture.

TECHNICAL SKILLS

- Frontend:** React.js, JavaScript, Bootstrap
- Backend:** Node.js, Express.js, MongoDB, Python
- Mobile :** React Native, Android Studio
- Languages:** Java, JavaScript

KEY PROJECTS

Student Learning Platform : A web-based education platform with learning dashboards, student activity tracking, performance visualization, and real-time monitoring of learning progress.

CodeBloc - Real-Time Code Collaboration Platform : A mini GitHub + VS Code in your browser. Multiple users edit code live with cursor tracking, team chat, version control, and a code execution sandbox.

Web Scraper App : Powerful data extraction tool. Scrape, parse, and export structured data from any website on demand.

INTERNSHIP EXPERIENCE

- Data Analytics Intern**
Training Trains - Dec 2024 – Jan 2025
Project: Web Scraper
Project URL: <https://web-scraper-2025.vercel.app/>
- Developed a web scraping application to collect and process data from online sources.
 - Utilized Python and Excel for data processing, reporting, and visualization.
 - Applied statistical and analytical techniques to improve data quality and interpretation.
- Artificial Intelligence Intern**
Firechip Education Technology Private Limited - Jul 2025 – Aug 2025
Project: Local AI Assistant using Large Language Models (LLMs)
- Worked on AI-based projects involving problem-solving, data analysis, and intelligent solution development.
 - Gained hands-on experience with machine learning fundamentals, AI workflows, and software development practices.
 - Strengthened analytical thinking, technical problem-solving, and professional communication skills.
